****Professional Summary****

Highly motivated and detail-oriented MCA graduate with a strong foundational understanding of computer science principles and C programming. After a 10-year career break for personal reasons, I am now dedicated to leveraging my analytical skills and academic background to embark on a fulfilling career in Software Testing. Actively pursuing comprehensive training in modern testing methodologies, tools (JIRA, Postman), database querying (SQL), and automation frameworks (Selenium with Python), I am eager to contribute to quality assurance teams and ensure high-quality software delivery.

****Skills****

* ****Programming Languages:**** C, Python (Currently Learning), SQL (Currently Learning)

* ****Testing Concepts:**** SDLC, STLC, Agile/Scrum, Types of Testing, Test Case Design, Defect Life Cycle

* ****Testing Tools:**** JIRA (Currently Learning), Postman (Currently Learning), Manual Testing Techniques

* ****Version Control:**** Git, GitHub (Currently Learning)

* ****Operating Systems:**** Windows

* ****Soft Skills:**** Analytical Thinking, Problem-Solving, Attention to Detail, Adaptability, Time Management, Eagerness to Learn

****Experience****

****Career Break**** | 2014 – Present

* Dedicated to personal and family responsibilities.

* Actively engaged in self-study and upskilling to re-enter the IT workforce.

* Focused on developing foundational skills in software testing, programming, and relevant tools.

****Education****

****Master of Computer Applications (MCA)**** | [University Name] | [Year of Graduation]

* Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Software Engineering, Object-Oriented Programming, C Programming.

****Projects****

*** **Manual Testing Project (Ongoing)****

* Developing a comprehensive test plan and detailed test cases for a selected e-commerce website (e.g., Flipkart).

* Practicing defect identification and reporting, applying learned test design techniques.

* *Goal: To demonstrate proficiency in manual testing methodologies.*

*** **SQL Data Validation Exercise (Ongoing)****

* Designing a basic database schema and executing SQL queries to validate data integrity for a hypothetical application.

* *Goal: To showcase understanding of database interaction for quality assurance.*

*** **API Testing with Postman (Ongoing)****

* Exploring public APIs using Postman to send requests, interpret responses, and apply basic assertions.

* *Goal: To develop practical skills in API testing.*

*** **Basic Web Automation Script (Planned)****

* Future project to automate a simple user journey (e.g., login, search) on a test website using Selenium WebDriver with Python.

* *Goal: To apply programming skills to basic automation tasks.*

****Certifications****

*** **ISTQB Foundation Level Certification** (Planned)**

* **[Relevant Course Completion Certificates from Udemy/Coursera for Python, SQL, JIRA, Postman]** (Planned/In Progress)

****Career Objective****

To secure an entry-level Junior Software Tester position where I can apply my strong academic background, newly acquired testing skills, and dedication to quality assurance. Eager to contribute to a dynamic team, continuously learn, and grow within the software testing domain.
