■ Professional Summary

Highly motivated and detail-oriented B.Tech graduate with a strong foundation in Java programming, eager to leverage analytical skills and a passion for quality assurance to launch a career in Software Testing. After a 10-year career break dedicated to personal responsibilities, I have proactively upskilled in modern QA methodologies, manual testing, and automation frameworks like Selenium WebDriver with Java and TestNG. Committed to contributing to innovative software development, I am seeking an entry-level Software Tester or QA Automation Engineer position to apply my renewed technical expertise and robust problem-solving abilities.

■ Skills

* **Programming Languages:** Java

* **Testing Tools & Frameworks:** Selenium WebDriver, TestNG, Postman, Rest Assured

* **Test Management & Bug Tracking:** Jira (familiarity)

* **Version Control:** Git, GitHub

* **Database:** SQL (Basic)

* **Methodologies:** Agile, Scrum, SDLC, STLC

* **Operating Systems:** Windows

* **Soft Skills:** Analytical Thinking, Problem-Solving, Attention to Detail, Self-Learning, Adaptability, Time Management

■ Education

****Bachelor of Technology (B.Tech) / Bachelor of Engineering (B.E)**** | [Your University Name], [City, State]

[Graduation Year, e.g., 2014]

Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming, Software Engineering Fundamentals

■ Projects

****1. E-commerce Website Automation Framework (Selenium, Java, TestNG, Maven)****

- * Developed an end-to-end automation framework for a demo e-commerce website, covering user registration, login, product search, and checkout flows.

- * Implemented Page Object Model (POM) for maintainable and scalable test scripts.

- * Integrated TestNG for test execution, assertions, and comprehensive HTML test reporting.

- * Managed project dependencies and build process using Maven.

- * Version controlled project code using Git and hosted on GitHub.

****2. REST API Automation Suite (Rest Assured, Java, TestNG)****

- * Created an automated test suite for a public REST API (e.g., ReqRes.in) to validate various endpoints (GET, POST, PUT, DELETE).

- * Utilized Rest Assured library to send HTTP requests, validate API responses, and assert status codes, headers, and JSON payloads.

- * Implemented TestNG for test organization and execution, generating clear test reports.

****3. Data Validation Project (Selenium, JDBC, Java, SQL)****

- * Automated a web application's form submission process using Selenium WebDriver.

- * Connected to a local database (e.g., MySQL) via JDBC to verify that submitted user data was accurately stored and retrieved using SQL queries.

- * Ensured data integrity between the UI and the database.

■ Certifications

- * [Planned or In-Progress: e.g., ISTQB Foundation Level (if pursued)]

- * [Course Completion Certificates from Udemy/Coursera (relevant to QA/Automation)]

■ Career Objective

To embark on a challenging and rewarding career as an entry-level Software Tester or QA Automation Engineer, leveraging a strong Java background, refreshed QA skills, and a B.Tech

education. Eager to contribute to a dynamic team, learn new technologies, and apply a diligent approach to ensuring high-quality software products while actively growing within a supportive organization.
